PROFESSIONAL SUMMARY

Results-driven software developer and IT professional specializing in C# .NET backend development, React.js frontend development, and Python automation. Experienced in building scalable web solutions, API integrations, and workflow automation systems. Proven track record in both corporate IT support/administration and software engineering internships.

TECHNICAL SKILLS

• **Back-End:** C#, ASP.NET (MVC architecture, CQRS pattern), RESTful API design and integration, Next.js • **Front-End:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS • **Database & Cloud:** MySQL, SQL Server (LocalDB), Microsoft Azure, Supabase • **Automation & Scripting:** Python (Teltonika GPS automation, scripts), VBA Macros • **Tools & DevOps:** Git, GitHub, VS Code, Visual Studio, Docker, Android Studio

WORK EXPERIENCE

IT Admin | SSD GPS Corporation | May 2026 – Present

- **Python Automation:** Developed the SSD Teltonika Automation App using Python to streamline GPS device provisioning and configuration, reducing manual overhead and improving operational efficiency.
- **Mobile Application Development:** Developed a mobile image capture application for field technicians using C# .NET, Flutter, SQL Server (LocalDB), and SQLite for real-time job logging and status updates.
- **Workflow Automation & Ticketing:** Implemented an IT ticketing and workflow solution using Microsoft Power Apps and Power Automate.
- **IT Support & QA:** Performed troubleshooting, configuration, testing, and quality checks on GPS tracking hardware and network infrastructure.

Software Developer Intern | Weepay Payment Processing Corp. | August – October 2025

- **Backend Services:** Built robust backend services and web-based quotation/cost calculation solutions using C# ASP.NET and Microsoft Azure, backed by SQL Server.
- **Architecture:** Applied MVC architecture and CQRS design pattern for scalable, maintainable, and high-performance development.

IT Admin | Our Lady of Guadalupe Colleges Inc. | July 2020 – August 2022

- Managed system maintenance, network infrastructure setup, and hardware/software troubleshooting to ensure 100% system reliability.

PROJECTS: Gown Rental Management System, Payslip Template generator, Teltonika Device Automation Application development quotation, Dispatcher monitoring + Technician Image captured app.

EDUCATION

Rizal Technological University, Boni Ave, Mandaluyong City Philippines

Bachelor of Science in Information Technology, 2026
