EDUCATION

Rizal Technological University, Boni Ave, Mandaluyong City Philippines
Bachelor of Science in Information Technology, 2026

WORK EXPERIENCE

IT Support | SSD GPS Corporation | May 2026 – Present

- IT Support & Quality Assurance: Perform troubleshooting, configuration, testing, and quality checks on GPS tracking devices to ensure proper functionality. Maintain and support computers, laptops, printers, internet connectivity, and other IT equipment.
- Python Automation: Developed the SSD Teltonika Automation App using Python to streamline GPS device provisioning and configuration, reducing manual work and improving operational efficiency.
- Mobile Application Development: Developed a mobile image capture application for field technicians using C# .NET, Flutter, SQL Server (LocalDB), and SQLite. Enabled field personnel to log jobs in real time, capture photos, and update job statuses.
- Workflow Automation & Ticketing: Implemented an IT ticketing and workflow solution using Microsoft Power Apps and Power Automate to improve issue reporting, tracking, and management.

IT Support | Our Lady of Guadalupe Colleges Inc. | July 2020 – August 2022

- Performed troubleshooting and maintenance of computer system and peripherals
- Set up and configured network infrastructure to support organization operations
- Assisted users with technical concerns and ensure the system reliability

Software Developer Intern | Weepay Payment Processing Corp. | August – October 2025

- Developed web-based solutions for quotation and cost calculations systems
- Built backend services using C# ASP.NET and Microsoft Azure, with SQL Server for database management
- Designed and optimized database structures, queries, and data handling processes
- Applied MVC architecture and CQRS design pattern for scalable and maintainable development

IT Intern | Rizal Technological University | March – May 2025

- Developed an automated payslip generation system using Microsoft Excel with VBA Macros
- Automated repetitive payroll processes, significantly improving efficiency and reducing manual errors
- Ensured accuracy, consistency, and reliability of generated payslip reports
- Designed user-friendly templates for easier data input and report generation

TECHNICAL SKILLS

- Front-End: React.js, JavaScript (ES6+), HTML5, CSS3
- Back-End: C#, ASP.NET (MVC architecture, CQRS pattern), RESTful API design and integration
- Database & Cloud: MySQL, SQL Server, Microsoft Azure, Supabase
- Full-stack application development: scalable, secure web apps with third-party API integration
- IT Support & Troubleshooting: Technical Troubleshooting, Hardware and Software Support, Networking and Connectivity Troubleshooting, Preventive Maintenance and Technical Support
- Professional Skills: Problem-Solving, Multitasking and Time Management, Organization and Attention to Detail, Teamwork and Collaboration, Ability to Work Under Pressure, Fast Learner and Adaptable, Willing to Learn
